OFFICIAL SCORING SYSTEM FOR NORTH AMERICAN BIG GAME TROPHIES

MINIMUM SCORES
AWARDS ALL-TIME

mountain	360	390
woodland	265	295
barren ground	375	400
Central Canada		
barren ground	345	360
Quebec-Labrador	365	375

CARIBOU

KIND OF CARIBOU (check one)

- mountain
- woodland
- barren ground
- Central Canada
- barren ground
- Quebec-Labrador

SEE OTHER SIDE FOR INSTRUCTIONS			COLUMN 1	COLUMN 2	COLUMN 3	COLUMN 4
A. Tip to Tip Spread			Spread Credit	Right Antler	Left Antler	Difference
B. Greatest Spread						
C. Inside Spread of Main Beams		SPREAD CREDIT MAY EQUAL BUT NOT EXCEED LONGER ANTLER				
D. Number of Points on Each Antler Excluding Brows						
Number of Points on Each Brow						
E. Length of Main Beam						
F-1. Length of Brow Palm or First Point						
F-2. Length of Bez or Second Point						
F-3. Length of Rear Point, If Present						
F-4. Length of Second Longest Top Point						
F-5. Length of Longest Top Point						
G-1. Width of Brow Palm						
G-2. Width of Top Palm						
H-1. Circumference at Smallest Place Between Brow and Bez Point						
H-2. Circumference at Smallest Place Between Bez and Rear Point						
H-3. Circumference at Smallest Place Between Rear Point and First Top Point						
H-4. Circumference at Smallest Place Between Two Longest Top Palm Points						
TOTALS						
ADD	Column 1	Exact Locality Where Killed:				
	Column 2	Date Killed:		Hunter:		
	Column 3	Owner:		Telephone #:		
Subtotal		Owner's Address:				
SUBTRACT Column 4		Guide's Name and Address:				
FINAL SCORE		Remarks: (Mention Any Abnormalities or Unique Qualities)				

I, _____, certify that I have measured this trophy on _____

PRINT NAME

MM/DD/YYYY

at _____

STREET ADDRESS

CITY

STATE/PROVINCE

and that these measurements and data are, to the best of my knowledge and belief, made in accordance with the instructions given.

Witness: _____ Signature: _____ I.D. Number

B&C OFFICIAL MEASURER

INSTRUCTIONS FOR MEASURING CARIBOU

All measurements must be made with a 1/4-inch wide flexible steel tape to the nearest one-eighth of an inch. (Note: A flexible steel cable can be used to measure points and main beams only.) Enter fractional figures in eighths, without reduction. Official measurements cannot be taken until the antlers have air dried for at least 60 days after the animal was killed.

- A. Tip to Tip Spread** is measured between tips of main beams.
- B. Greatest Spread** is measured between perpendiculars at a right angle to the center line of the skull at widest part, whether across main beams or points.
- C. Inside Spread of Main Beams** is measured at a right angle to the center line of the skull at widest point between main beams. Enter this measurement again as the Spread Credit if it is less than or equal to the length of the longer antler; if greater, enter longer antler length for Spread Credit.
- D. Number of Points on Each Antler:** To be counted a point, a projection must be at least one-half inch long, with length exceeding width at one-half inch or more of length. Beam tip is counted as a point but not measured as a point. There are no "abnormal" points in caribou.
- E. Length of Main Beam** is measured from the center of the lowest outside edge of burr over the outer side to the most distant point of the main beam. The point of beginning is that point on the burr where the center line along the outer side of the beam intersects the burr, then following generally the line of the illustration.
- F-1-2-3. Length of Points** are measured from nearest edge of beam over outer curve to tip. Lay the tape along the outer curve of the beam so that the top edge of the tape coincides with the top edge of the beam on both sides of point to determine the baseline for point measurement. Record point lengths in appropriate blanks.
- F-4-5.** Length of Points are measured from the tip of the point to the top of the beam, then at a right angle to the bottom edge of beam. The Second Longest Top Point **cannot** be a point branch of the Longest Top Point.
- G-1. Width of Brow** is measured in a straight line from top edge to lower edge, as illustrated, with measurement line at a right angle to main axis of brow.
- G-2. Width of Top Palm** is measured from midpoint of lower edge of main beam to midpoint of a dip between points, at widest part of palm. The line of measurement begins and ends at midpoints of palm edges, which gives credit for palm thickness.
- H-1-2-3-4. Circumferences** are taken as illustrated for measurements. If brow point is missing, take H-1 at smallest point between burr and bez point. If rear point is missing, take H-2 and H-3 measurements at smallest place between bez and first top point. Do not depress the tape into any dips of the palm or main beam.

ENTRY AFFIDAVIT FOR ALL HUNTER-TAKEN TROPHIES

For the purpose of entry into the Boone and Crockett Club's® records, North American big game harvested by the use of the following methods or under the following conditions are ineligible:

- I. Spotting or herding game from the air, followed by landing in its vicinity for the purpose of pursuit and shooting;
- II. Herding or chasing with the aid of any motorized equipment;
- III. Use of electronic communication devices, artificial lighting, or electronic light intensifying devices;
- IV. Confined by artificial barriers, including escape-proof fenced enclosures;
- V. Transplanted for the purpose of commercial shooting;
- VI. By the use of traps or pharmaceuticals;
- VII. While swimming, helpless in deep snow, or helpless in any other natural or artificial medium;
- VIII. On another hunter's license;
- IX. Not in full compliance with the game laws or regulations of the federal government or of any state, province, territory, or tribal council on reservations or tribal lands;

I certify that the trophy scored on this chart was not taken in violation of the conditions listed above. In signing this statement, I understand that if the information provided on this entry is found to be misrepresented or fraudulent in any respect, it will not be accepted into the Awards Program and 1) all of my prior entries are subject to deletion from future editions of **Records of North American Big Game** 2) future entries may not be accepted.

FAIR CHASE, as defined by the Boone and Crockett Club®, is the ethical, sportsmanlike and lawful pursuit and taking of any free-ranging wild, native North American big game animal in a manner that does not give the hunter an improper advantage over such game animals.

The Boone and Crockett Club® may exclude the entry of any animal that it deems to have been taken in an unethical manner or under conditions deemed inappropriate by the Club.
